products by UVeritech™

Now 5X More Powerful

## UV Penlight Professional Edition

**The Fraud Fighter™ Pro-Edition UV Penlight uses a genuine 375 nm LED, so you can see ALL possible UV features!**

A law enforcement favorite, the **Fraud Fighter™ Pro-Edition UV Penlight** may be used to detect counterfeit currency, credit cards, driver licenses, secure and chemically altered checks, cashiers checks, passports, visas and many other important documents. Patents pending worldwide.

Unlike small, toy-like UV key-chain lights, the **Fraud Fighter™ Pro-Edition UV Penlight** is the tool of a professional featuring metal construction, five-year warranty and water resistance. In addition, special circuitry adjusts power from the batteries and delivers just the right current to the LED to maintain maximum brightness and ensure the proper UV output even if the batteries are not fully charged.

The **Pro-Edition UV Penlight** performs at specified wavelength throughout the life of the batteries. The **Fraud Fighter™ Pro-Edition UV Penlight** is the size of a normal fountain pen and may be used in any location in normal lighting conditions.
