

Credit Card Quick Check

The diagram illustrates a credit card with callouts to various security features and checks. On the front of the card, callouts point to the EMV chip, the first four digits of the card number, the last four digits of the card number, and the cardholder's name. On the back of the card, callouts point to the signature strip, the last four digits of the card number, and the signature itself.

Always swipe card or use EMV Chip.

1st 4 numbers match 4 numbers underneath.

Last 4 numbers match last 4 numbers on POS Screen, receipt or back of card.

Cardholder name matches on POS Screen or receipt.

Also check for:

- Overall damage to the card
- Reprinted or re-embossed numbers or cardholder name
- Magnetic strip/EMV not working
- Logo under UV light

Last 4 numbers or entire card number on signature line. Compare to numbers on the front of the card.

Check for signature or damage to signature area.

Not Valid Unless Signed
